Subject: Woodlawn HIA/ERP

Dan

As we discussed, today I am sending you the second and, I hope, final revision of the Habitat Impact Analysis/Environmental Restoration Plan (dated 6/25/98) for the Woodlawn Landfill cap (which, pending comments recieved on EPA's proposed plan to amend the ROD, will be a contingency remedy at the site to be implemented if ground water quality begins to deteriorate). It appears that USFWS comments have been largely addressed. For example, the contractor has included habitat monitoring "watch" sites along transects and a figure and text describing stream sampling locations, and has clarified the schedule for stream monitoring.

Eric Newman will be the RPM for this site while I am on leave. Please contact him regarding the adequacy of the PRP's responses to comments on the HIA/ERP within three weeks of your receipt of the document. Thanks!

Eric's e-mail address: newman.eric@epamail.epa.gov

Telephone: 215-566-3237 (until July 16)
215-814-3237 (after July 20)

Address: (3HS23), 841 Chestnut St. (until July 16)
Effective July 20: (3HS23) USEPA Region III, 1650 Arch St.,
Philadelphia, PA 19103-2029
